

1. Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

16/10/23

Experiment - 1

① Create a simple cloud software application and provide it as a service using any cloud service provider to demonstrate software as a service (SaaS).

Aim:-
To develop a simple cloud application using zoho app builder.

Procedure:-

- sign up or login to zoho creator, a low code development platform. Create a new application for cab booking system.
- use zoho creator built in testing tool or external tool like postman to test API.
- create forms and fields for information like customer details, driver details, booking records etc.
- define the data structure for your cab booking system.
- Ensure that your API complies with relevant and best practices in transportation and data protection.

Result:- This application for cab booking has been successfully created using zoho app builder.

4. Create a simple cloud software application for student mark list System using any Cloud Service Provider to demonstrate SaaS.

Experiment - 4

Create a simple cloud software application to student mark list.

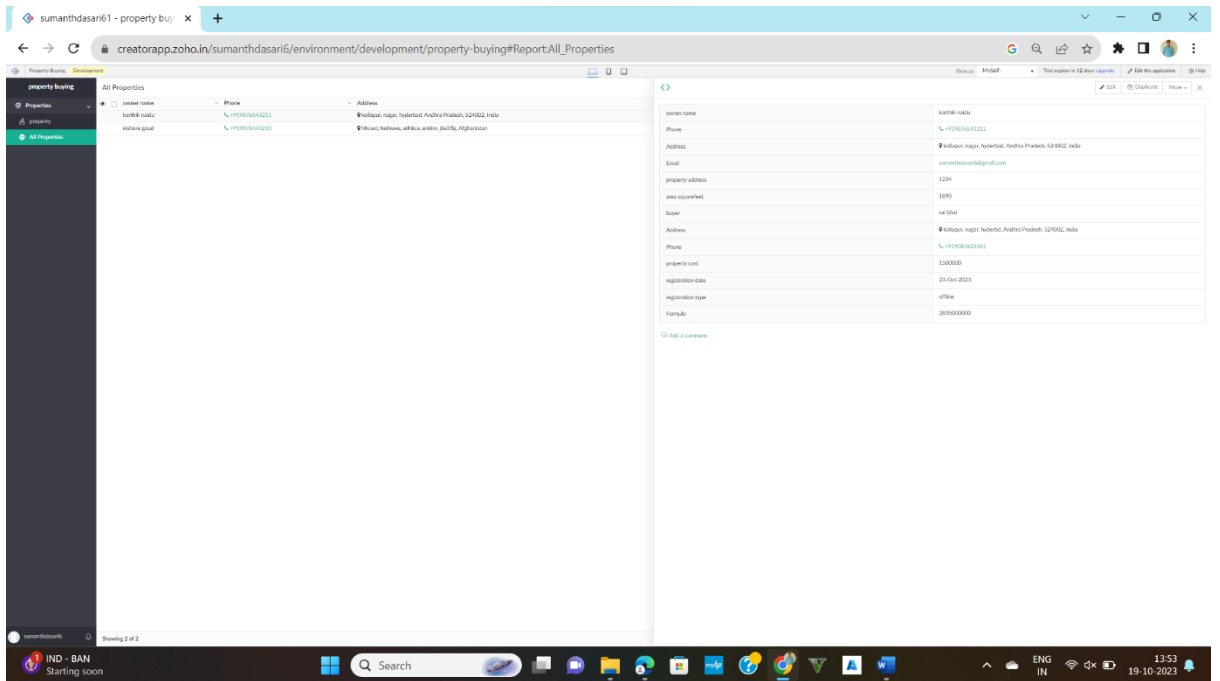

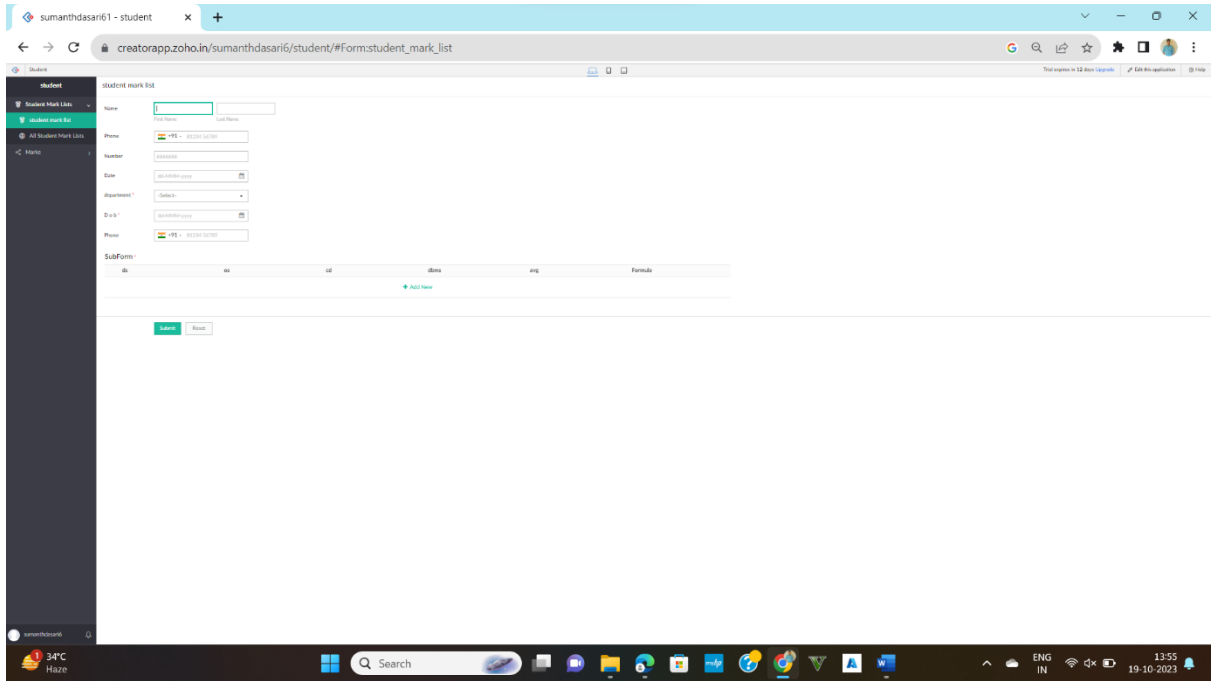

Aim:- to create a software for student mark list using zoho app builder.

Procedure:-

- using zoho app builder we can develop a software cloud application for mark list
- sign in or sign up to zoho creator
- to design the fields to store the student in to like name, (reg no, Defect)
 All fields
- Design a mark list for student in a another tab form
- using the zoho creator tools and environment test the application.

Result:-

The application for student mark list is successfully create in zoho app builder.

5. Create a simple cloud software application for pay roll System using any Cloud Service Provider to demonstrate SaaS

Experiment - 5

To create a web API for pay roll

Aim:- To create a web API for an pay roll using zoho app builder.

Procedure:-

- using zoho app builder we can develop a software cloud application for pay roll
- sign in / sign up for the zoho creator.
- Create a new form with application name in the new field.
- design the field using formula function to calculate to total
- and design the another, field to store in data ~~by~~ in the basic salary.

Formula → Total
Tested with inputs & stores the value to DD.

Result:-

The application was created successfully in zoho app builder for pay roll.

7. Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux)

Experimental - 8

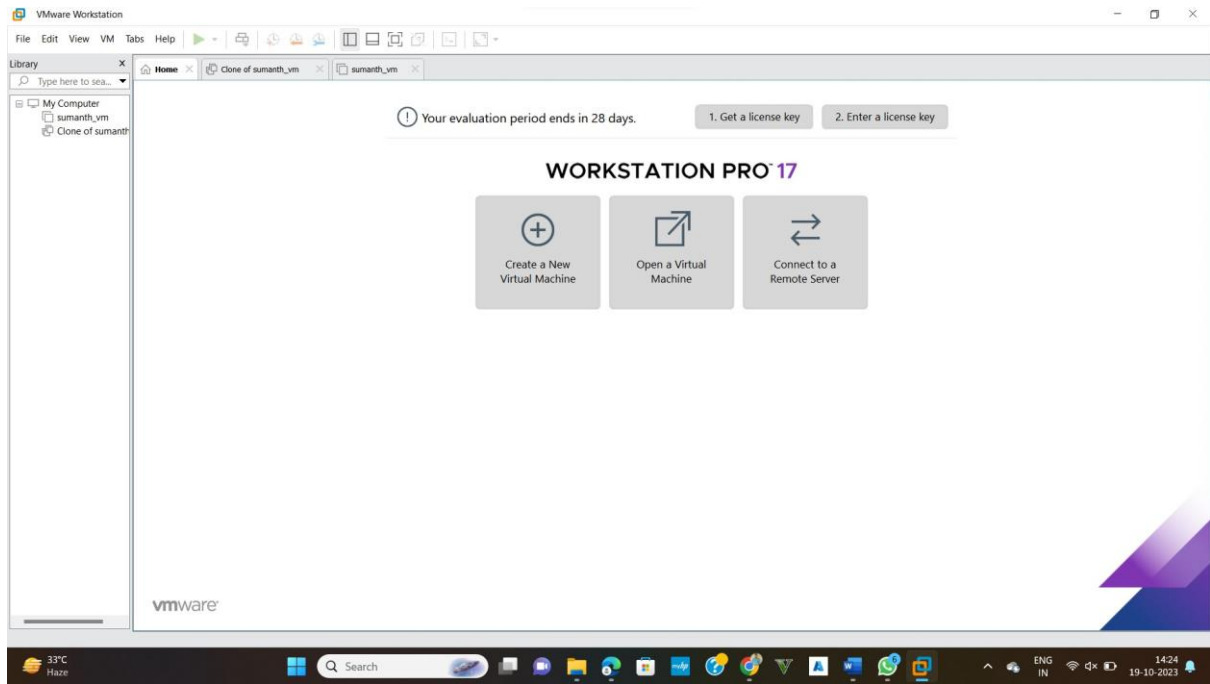

Demonstrate virtualization by installing type-2 hypervisor in your device create and configure vm image with a host organization system.

Aim:- To demonstrate virtualization of installing type-2 hypervisor in your device, create and configure vm image with a host operating system.

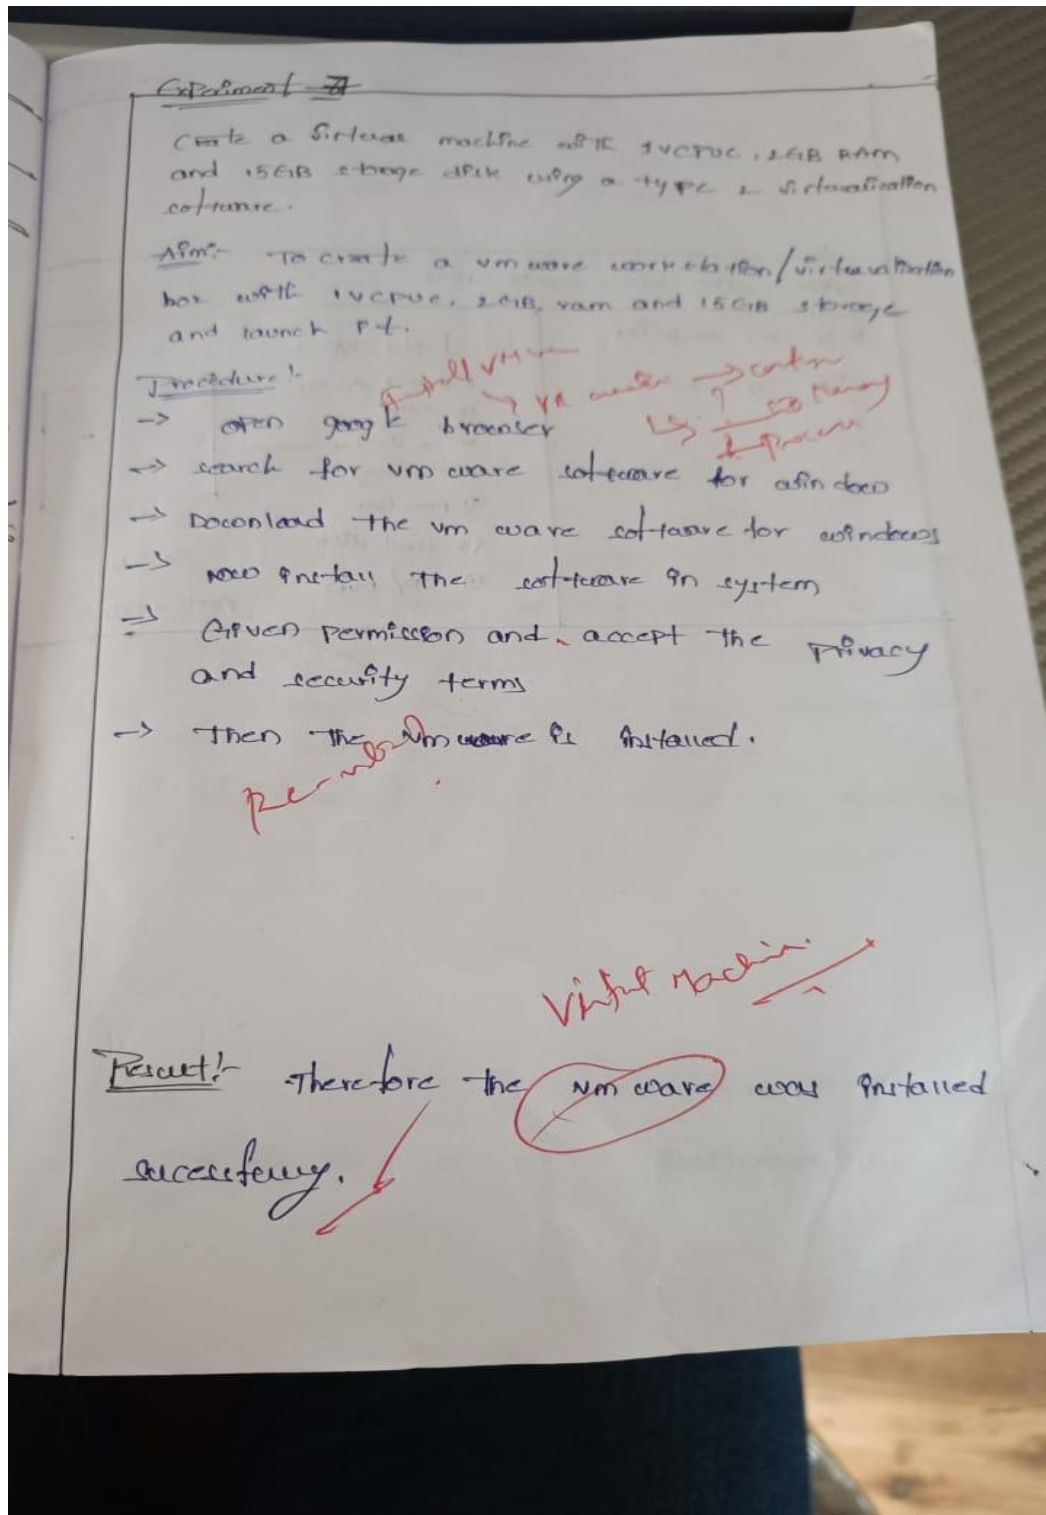

Procedure:-

- * first open vmware workstation
- * create a new virtual machine ~~chir~~
- * click on next and assign suitable memory
- * select vm tool on header bar.
- * choose settings and click on add
- * Add hard disk or cd/ dvd drive and adjust memory and click on ok
- * then added field displayed on new vm.

Result:- Thus, the implementation type 2 hypervisor was successfully implemented.

8. Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software

9. Create a Virtual Hard Disk and allocate the storage using VM ware Workstation

Experiment - 9

Create a virtual hard disk and allocate the storage using vmware workstation.

Aim:- To create a virtual hard disk and allocate the storage using vmware workstation.

Procedure:-

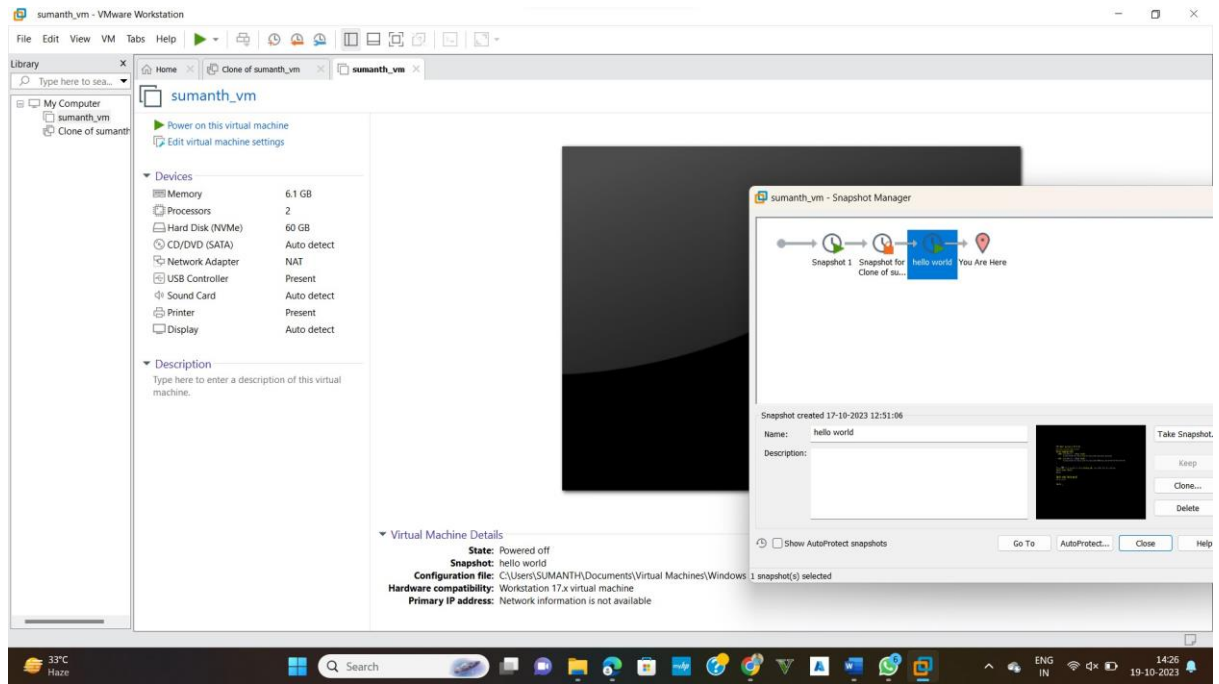

* First open the vmware workstation

* There you can see create a new virtual machine open a virtual machines and connect to remote server.

* Next the create a new virtual machine

* click on next and allocate the storage and give a name to vm.

Result:- Thus, the virtual hard disk and allocation of storage in vmware workstation was implemented.

10. Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

Experiment - 10

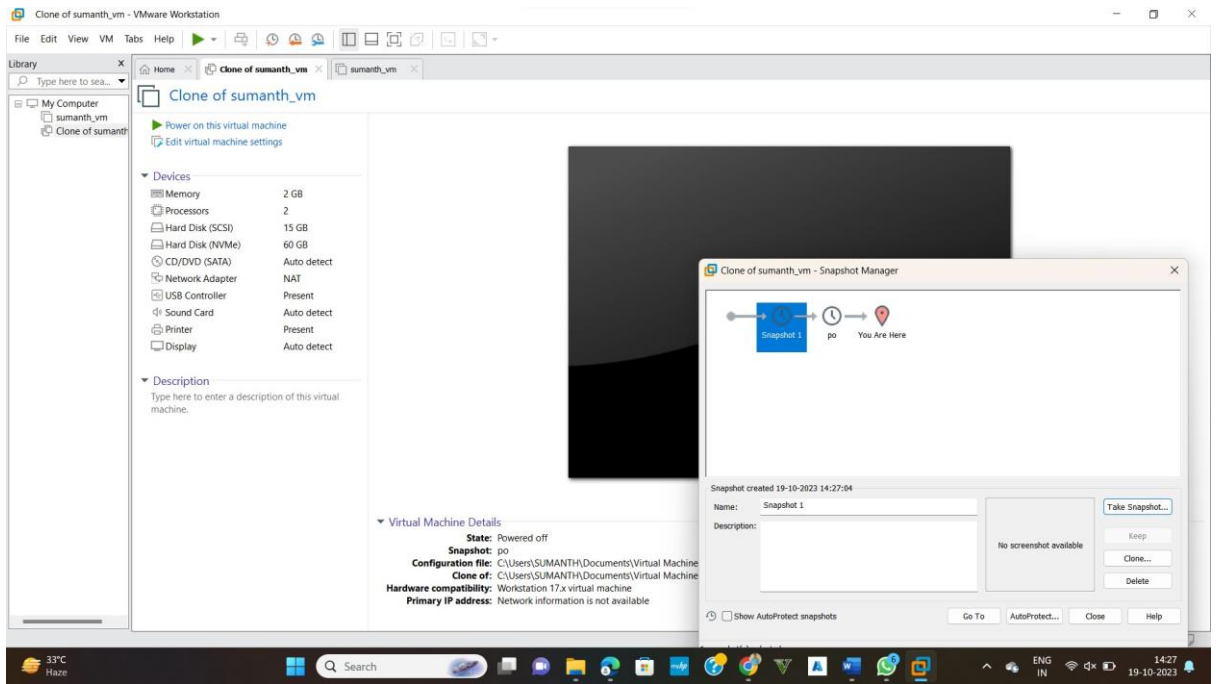

Create a snapshot of a vm and test it by loading the previous version cloned vm

Aim:- To create a snapshot of a vm

Procedure:-

- * open a vmware workstation software
- * create new virtual machine
- * click and next and assign storage
- * now run this vmware application.
- * select vm tool in header bar.
- * there you can find snapshot and click on the snapshot. select snapshot.

Result:- Thus, the taking of snapshot of a vm was implemented.

11. Change Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured.

Experiment - 10

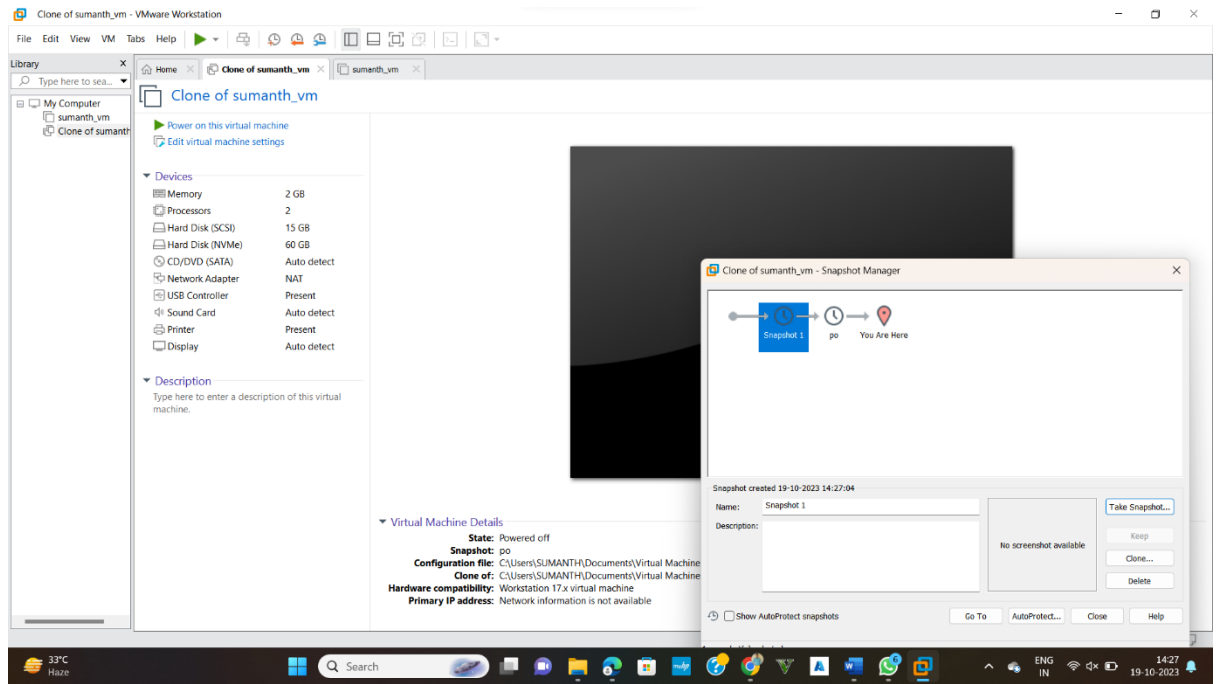

Create a cloning of a vm and test it by loading the previous version / cloned vm.

Aim:- To create a cloning of a vm and test it by loading the previous version / cloned vm

Procedure:-

- * open vmware workstation software.
- * create a new virtual machine
- * click on next and assign storage
- * select vm tool and header. *Continue* →
- * there you can see a manage tool and click on the manage.
- * After selecting manage, there clone tool is visible.
- * select *and* click on clone, after that click on next and give name for cloned virtual machine.

Result:- Thus, cloning of a vm was implemented successfully. ✓

12. change hardware clone of a vm which is already created on configure

Experiment 12

Change hardware compatibility of a vm (either by clone/create new one) which is already created and configured.

Aim:- To change hardware compatibility of a vm (either by clone/create new one) which is already created and configured.

Procedure:-

- * open vmware workstation software.
- * create a new virtual machine.
- * click on next and assign software.
- * select vm tool on header bar.
- * there you can see a manage tool and click on the manage.
- * after selecting manage, there clone tool is visible.
- * select and click on clone, after that click on next and give name for cloned virtual machine.
- * now select vm tool and click on snapshot to take snapshot.

Result:-

Thus, cloning of vmware and snapshot was executed successfully.
